

CyberOptics Garner Mexico Technology Award for MRS-Enabled SQ3000™ Inspection and Metrology System

Minneapolis, Minnesota — October 2019 — [CyberOptics® Corporation](#) (NASDAQ: CYBE), a leading global developer and manufacturer of high-precision 3D sensing technology solutions, announced that it was awarded a 2019 Mexico Technology Award in the category of Inspection – SPI for its 3D SQ3000™ Multi-Function system for AOI, SPI and CMM. The award was presented to the company during a Wednesday, Oct. 23, 2019 ceremony that took place during the SMTA Guadalajara Expo & Tech Forum.

The SQ3000, deemed best-in-class, has been widely used for 3D Automated Optical Inspection (AOI) and can be used for [3D Solder Paste Inspection \(SPI\)](#) for the best accuracy, repeatability and reproducibility – even on the smallest paste deposits.

Additionally, the SQ3000 can be used to attain highly accurate coordinate measurements faster than a traditional Coordinate Measurement Machine (CMM) – in seconds, not hours. The world’s [first in-line CMM](#) includes a comprehensive software suite for use in SMT, semiconductor, microelectronics and other metrology applications.

“We are very honored to receive a Mexico Technology Award for the SQ3000 Multi-Function inspection and metrology system,” said Dr. Subodh Kulkarni, President and CEO, CyberOptics Corporation. “The versatility of this unique all-in-one system enables customers to use it for multiple applications to improve their yields, quality and processes. It continues to be rapidly adopted as the premier process control solution.”

The SQ3000 offers a combination of unmatched accuracy and speed with the industry-leading Multi-Reflection Suppression (MRS) sensor technology that meticulously identifies and rejects reflections caused by shiny components and surfaces. Effective suppression of multiple reflections is critical for highly accurate measurement, making the proprietary MRS technology an ideal solution for a wide range of applications with exacting requirements.

The Mexico Technology Awards acknowledge the latest innovations available in Mexico produced by OEM manufacturing equipment and materials suppliers over the last 12 months.

About CyberOptics

CyberOptics Corporation (www.cyberoptics.com) is a leading global developer and manufacturer of high-precision 3D sensing technology solutions. CyberOptics’ sensors are used for inspection and metrology in the SMT and semiconductor capital equipment markets to significantly improve yields and

productivity. By leveraging its leading edge technologies, the Company has strategically established itself as a global leader in high precision 3D sensors, allowing CyberOptics to further increase its penetration of key vertical markets. Headquartered in Minneapolis, Minnesota, CyberOptics conducts worldwide operations through its facilities in North America, Asia and Europe.

Statements regarding the Company's anticipated performance are forward-looking and therefore involve risks and uncertainties, including but not limited to: market conditions in the global SMT and semiconductor capital equipment industries; the timing of orders and shipments of our products, particularly our 3D MRS-enabled AOI systems; increasing price competition and price pressure on our product sales, particularly our SMT systems; the level of orders from our OEM customers; the availability of parts required to meet customer orders; unanticipated product development challenges; the effect of world events on our sales, the majority of which are from foreign customers; rapid changes in technology in the electronics and semiconductor markets; product introductions and pricing by our competitors; the success of our 3D technology initiatives; the market acceptance of our SQ3000 3D CMM system, products for semiconductor wafer level and advanced packaging inspection and metrology and CyberGage360 product; costly and time consuming litigation with third parties related to intellectual property infringement; and other factors set forth in the Company's filings with the Securities and Exchange Commission.
