

CyberOptics Demonstrates Industry-Leading Inspection & Measurement System for AOI, SPI and CMM at NEPCON Korea

Minneapolis, Minnesota — May 2019 — [CyberOptics® Corporation](#) (NASDAQ: CYBE), a leading global developer and manufacturer of high-precision 3D sensing technology solutions, will exhibit at NEPCON Korea, scheduled to take place May 15-17, 2019 at the COEX in Seoul. The company will demonstrate the [MRS-Enabled 3D SQ3000™](#) with multi-process capabilities including [3D Automated Optical Inspection \(AOI\)](#), [3D Solder Paste Inspection \(SPI\)](#) and [Coordinate Measurements \(CMM\)](#) in Booth #K112.

The 3D SQ3000 all-in-one system can identify critical defects and measure critical parameters, providing a superior process control solution for effective yield management. In addition to AOI and SPI applications, highly accurate coordinate measurements can be attained faster than a traditional Coordinate Measurement Machine (CMM) – in seconds, not hours. The world's first in-line CMM includes an extensive software suite for metrology grade measurement on all critical points.

Powered by proprietary MRS sensor technology, the SQ3000 offers unmatched accuracy by meticulously identifying and rejecting reflections caused by shiny components making MRS an ideal technology solution for a wide range of applications with stringent requirements. The Ultra-High Resolution MRS sensor option delivers superior performance ideally suited for socket metrology, microelectronics and other applications where an even greater degree of accuracy and inspection reliability is critical.

About CyberOptics

CyberOptics Corporation (www.cyberoptics.com) is a leading global developer and manufacturer of high precision sensing technology solutions. CyberOptics' sensors are used in SMT, semiconductor and metrology markets to significantly improve yields and productivity. By leveraging its leading edge technologies, the company has strategically established itself as a global leader in high precision 3D sensors, allowing CyberOptics to further increase its penetration of key vertical markets. Headquartered in Minneapolis, Minnesota, CyberOptics conducts worldwide operations through its facilities in North America, Asia and Europe.

Statements regarding the company's anticipated performance are forward-looking and therefore involve risks and uncertainties, including but not limited to: market conditions in the global SMT and semiconductor capital equipment industries; the timing of orders and shipments of our products,

particularly our 3D MRS-enabled AOI systems; increasing price competition and price pressure on our product sales, particularly our SMT systems; the level of orders from our OEM customers; the availability of parts required to meet customer orders; unanticipated product development challenges; the effect of world events on our sales, the majority of which are from foreign customers; rapid changes in technology in the electronics and semiconductor markets; product introductions and pricing by our competitors; the success of our 3D technology initiatives; the market acceptance of our SQ3000 3D CMM system, products for semiconductor mid-end and advanced packaging inspection applications and CyberGage360 product; costly and time consuming litigation with third parties related to intellectual property infringement; and other factors set forth in the company's filings with the Securities and Exchange Commission.
