

CyberOptics Receives Mexico Technology Award for Dual-Mode MRS® sensor-enabled SE3000™ SPI System

29th Award Win for Proprietary MRS Sensor Technology

Minneapolis, Minnesota — September 22, 2022 — [CyberOptics® Corporation](#) (NASDAQ: CYBE), a leading global developer and manufacturer of high-precision 3D sensing technology solutions, today announced that it received a 2022 Mexico Technology Award in the category of Inspection – Solder Paste Inspection (SPI) for its new Dual-Mode Multi-Reflection Suppression® (MRS)® sensor-enabled SE3000™ SPI system. The award was announced during a ceremony that took place Wednesday, Sept. 21, 2022 during SMTA Guadalajara in Mexico.

The new Dual-Mode MRS sensor for the [SE3000™ SPI system](#) provides maximum flexibility for dedicated solder paste inspection applications, with one mode for high-speed inspection and another mode for high resolution inspection. The new sensor is an extension of the proprietary MRS sensor portfolio that provides industry-leading performance in semiconductor and SMT markets. The SE3000 is ideal for measuring height, area, volume, registration and bridging, as well as detecting insufficient paste, excess height, smear, offset and more.

“We’re delighted to receive our 29th award related to our MRS sensor technology,” said Dr. Subodh Kulkarni, President and CEO, CyberOptics Corporation. “Our customers value the superior performance and the flexibility to switch modes to high-resolution or high-speed depending on their SPI application needs. We’re providing yet another MRS sensor solution that improves our customers’ yields and processes.”

MRS sensor technology provides the ultimate combination of speed, resolution and accuracy while meticulously identifying and rejecting reflection-based distortions caused by shiny components and surfaces.

The Mexico Technology Awards acknowledge the latest innovations available in Mexico produced by OEM manufacturing equipment and materials suppliers during the last 12 months. For more information, visit www.mexicoems.com/mta-awards.

About CyberOptics

CyberOptics Corporation (www.cyberoptics.com) is a leading global developer and manufacturer of high-precision 3D sensing technology solutions. CyberOptics’ sensors are used for inspection and metrology in the SMT and semiconductor markets to significantly improve yields and productivity. By leveraging its leading-edge technologies, the Company has strategically established itself as a global leader in high precision 3D sensors, allowing CyberOptics to further increase its penetration of key vertical markets. Headquartered in Minneapolis, Minnesota, CyberOptics conducts worldwide operations through its facilities in North America, Asia and Europe.

Statements regarding the Company's anticipated performance are forward-looking and therefore involve risks and uncertainties, including but not limited to: a possible world-wide recession or depression resulting from the economic consequences of the COVID-19 pandemic; the negative effect on our revenue and operating results of the COVID-19 crisis on our customers and suppliers and the global supply chain; market conditions in the global SMT and semiconductor capital equipment industries; trade relations between the United States and China and other countries; the effects of inflation on our future costs; the timing of orders and shipments of our products, particularly our 3D MRS™ SQ3000™ and SQ3000™ + Multi-Function systems™ and MX systems for memory module inspection; increasing price competition and price pressure on our product sales, particularly our inspection and metrology systems; the level of orders from our OEM customers; the availability of parts required to meet customer orders; unanticipated product development challenges; the effect of world events on our sales, the majority of which are from foreign customers; rapid changes in technology in the electronics and semiconductor markets; product introductions and pricing by our competitors; the success of our 3D technology initiatives; the market acceptance of our SQ3000 and SQ3000+ Multi-Function systems and products for semiconductor advanced packaging inspection and metrology; costly and time consuming litigation with third parties related to intellectual property infringement; the negative impact on our customers and suppliers due to past and future terrorist threats and attacks and any acts of war; the impact of the MX3000™ orders on our consolidated gross margin percentage in any future period; risks related to cancellation or renegotiation of orders we have received; and other factors set forth in the Company's filings with the Securities and Exchange Commission.
